Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13)

Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13)

The material contained in this book was presented at the Boerhaave Course which was held in Leiden, The Netherlands, on May 2 and 3, 1977. It deals with three topics of considerably recent interest, not only to cardiologists and cardiovascular surgeons, but also to embryologists, anatomists and pathologists. Papers on the development and the normal anatomy of the conduction system include a discussion of the continuing controversy as to whether discrete and anatomically distinct internodal pathways exist in the human heart. These are followed by descriptions of the abnormal anatomy and relationships of the conduction system in certain complex cardiovascular anomalies. The rather startling discovery that there may be a second, ectopically located and functioning atrioventricular node and common bundle in addition to the usual, but non-functioning one has been of enormous importance in the surgical treatment of certain forms of congenital heart disease. The panel presentations comprising the first four papers on the topic of transposition of the great arteries highlight the widely differing views at the continuing controversies concerning the nature and pathogenesis of this relatively common and important anomaly. Descriptions of the special morphologic features of ventricular septal defect and pulmonary stenosis as they occur in association with transposition are followed by discussions concerning recent advances in the surgical treatment of transposition, and the common and often troublesome postoperative arrhythmias.

From reader reviews:

Charlotte Maas:

In other case, little folks like to read book Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13). You can choose the best book if you love reading a book. So long as we know about how is important some sort of book Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13). You can add understanding and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can recognize everything! From your country right up until foreign or abroad you can be known. About simple point until wonderful thing you could know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You need to use it when you feel fed up to go to the library. Let's learn.

Kimberly Dyson:

The reserve untitled Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13) is the publication that recommended to you to study. You can see the quality of the guide content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share to you personally is absolutely accurate. You also might get the e-book of Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13) from the publisher to make you much more enjoy free time.

Bobby Hall:

Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13) can be one of your basic books that are good idea. All of us recommend that straight away because this e-book has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to put every word into joy arrangement in writing Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13) although doesn't forget the main point, giving the reader the hottest and based confirm resource details that maybe you can be one of it. This great information can certainly drawn you into completely new stage of crucial pondering.

Contessa Watkins:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Embryology and Teratology of the Heart and the Great Arteries: Conducting System; Transposition of the Great Arteries; Ductus Arteriosus (Boerhaave ... Postgraduate Medical Education) (Volume 13) can make you really feel more interested to read.
