**Liver MRI: Correlation with Other Imaging Modalities and Histopathology** Shahid Hussain, Michael Sorrell

The second edition of this very successful book provides a practical approach to liver MRI, with coverage of the most up-to-date MR imaging sequences, normal and variant anatomy and diverse pathologic conditions. It features computer-generated drawings relating clinical concepts to the MRI findings, 2D and 3D reconstructions, systematic (differential) diagnostic information and descriptions of patient management options. MRI findings are correlated to ultrasound, computed tomography, nuclear medicine exams, laboratory findings and histopathology when appropriate. New information is presented on a wide range of topics and more than 50 extra figure pages are included. This book will greatly benefit all professionals interested and involved in imaging, diagnosis and treatment of focal and diffuse liver lesions, including radiologists, gastroenterologists, hepatologists, surgeons, pathologists, MR physicists, radiology and other residents, MR technologists and medical students.
