Stars (Scientific American Library Paperback)

James B. Kaler

Stars (Scientific American Library Paperback) James B. Kaler

In this fascinating Journey to the farther reaches of space, astronomer James Kaler explores the nature of stars, describing their origins, varieties, distributions, compositions, and distinctive histories. He demonstrates that stars are the key to our comprehension of how the universe evolved--and that the birth, development, and death of stars is intimately associated with our own origins.

From the earliest folklore to recent theories about dark matter, *Stars* chronicles the science of stellar astronomy, concluding with the evolution of high mass stars, whose spectacular deaths generate supernovae, pulsars, neutron stars, and enigmatic black holes. Elegantly written and illustrated, *Stars* is a compelling portrait of the cosmos as a vast engine of regeneration where stars are born, live, and die.
