Twenty Thousand Leagues Under The Sea

Jules Verne

Twenty Thousand Leagues Under The Sea Jules Verne

The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with *Around the World in Eighty Days* and *Journey to the Center of the Earth*. The description of Nemo's ship, called the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. Thus, the book has been able to age well because of its scientific theories, unlike some of Verne's other works, like *Journey to the Center of the Earth*, which are not scientifically accurate and serve more simply as adventure novels.
