Cold Fusion: The Scientific Fiasco of the Century

John R. Huizenga

Cold Fusion: The Scientific Fiasco of the Century John R. Huizenga

Professor Huizenga, Co-Chairman of the U.S. Department of Energy Cold Fusion Panel that investigated the claims of Pons and Fleischmann--the scientists behind the ill-fated "cold fusion" experiments at the University of Utah in 1989-- here documents the entire fascinating saga and provides a careful and thorough study of the controversy that followed. The factual, hardhitting account concludes with a discussion of the lessons to be learned from the episode and the implications for the proper conduct of science. In this new paperback edition, the author has taken the opportunity to bring the story of cold fusion up-to-date. This definitive account, will interest all scientists and historians of science, as well as general readers interested in the issues of experimental science and ethical conduct.
