Jonas Hall, Thomas Lingefjärd

Mathematical Modeling: Applications with GeoGebra Jonas Hall, Thomas Lingefjärd

A logical problem-based introduction to the use of GeoGebra for mathematical modeling and problem solving within various areas of mathematics

A well-organized guide to mathematical modeling techniques for evaluating and solving problems in the diverse field of mathematics, *Mathematical Modeling: Applications with GeoGebra* presents a unique approach to software applications in GeoGebra and WolframAlpha. The software is well suited for modeling problems in numerous areas of mathematics including algebra, symbolic algebra, dynamic geometry, three-dimensional geometry, and statistics. Featuring detailed information on how GeoGebra can be used as a guide to mathematical modeling, the book provides comprehensive modeling examples that correspond to different levels of mathematical experience, from simple linear relations to differential equations.

Each chapter builds on the previous chapter with practical examples in order to illustrate the mathematical modeling skills necessary for problem solving. Addressing methods for evaluating models including relative error, correlation, square sum of errors, regression, and confidence interval, *Mathematical Modeling: Applications with GeoGebra* also includes:

- Over 400 diagrams and 300 GeoGebra examples with practical approaches to mathematical modeling that help the reader develop a full understanding of the content
- Numerous real-world exercises with solutions to help readers learn mathematical modeling techniques
- A companion website with GeoGebra constructions and screencasts

Mathematical Modeling: Applications with GeoGebra is ideal for upper-undergraduate and graduate-level courses in mathematical modeling, applied mathematics, modeling and simulation, operations research, and optimization. The book is also an excellent reference for undergraduate and high school instructors in mathematics.

From reader reviews:

Joseph McNeal:

What do you concentrate on book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Only you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Mathematical Modeling: Applications with GeoGebra. All type of book would you see on many resources. You can look for the internet sources or other social media.

Robert Nguyen:

In this period globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Mathematical Modeling: Applications with GeoGebra this reserve consist a lot of the information with the condition of this world now. That book was represented how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some investigation when he makes this book. That is why this book suitable all of you.

Laura Hargis:

Is it an individual who having spare time then spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Mathematical Modeling: Applications with GeoGebra can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these guides have than the others?

Laura Dupont:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you may have it in e-book way, more simple and reachable. This kind of Mathematical Modeling: Applications with GeoGebra can give you a lot of close friends because by you checking out this one book you have issue that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't realize, by knowing more than some other make you to be great people. So , why hesitate? Let us have Mathematical Modeling: Applications with GeoGebra.
