Rogue Star Michael F. Flynn
[Read by Malcolm Hillgartner]

Michael Flynn opened his saga of near-future technology and space exploration with *Firestar*, in which he introduced a set of characters orbiting around one powerful and determined woman: Mariesa van Huyten, who is obsessed with the need to get humanity back into space and to save Earth from disaster. In *Rogue Star*, van Huyten's struggles continue.

Three astronauts are headed out beyond Mars on the first human trip to the asteroid belt. In orbit around Earth, a construction crew is building the first permanent space station, owned by van Huyten's consortium. Meanwhile, the president of the United States is trying to force her into making a secret deal to put weapons in orbit so he can intervene in the ongoing wars.

Van Huyten's plan is in place -- and some people will kill to stop it.
