Elliott H. Lieb, Robert Seiringer, Jan Philip Solovej, Jakob Yngvason

The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) Elliott H. Lieb, Robert Seiringer, Jan Philip Solovej, Jakob Yngvason

This book contains a unique survey of the mathematically rigorous results about the quantum-mechanical many-body problem that have been obtained by the authors in the past seven years. It addresses a topic that is not only rich mathematically, using a large variety of techniques in mathematical analysis, but is also one with strong ties to current experiments on ultra-cold Bose gases and Bose-Einstein condensation. The book provides a pedagogical entry into an active area of ongoing research for both graduate students and researchers. It is an outgrowth of a course given by the authors for graduate students and post-doctoral researchers at the Oberwolfach Research Institute in 2004. The book also provides a coherent summary of the field and a reference for mathematicians and physicists active in research on quantum mechanics.

From reader reviews:

Mary McKay:

Book is written, printed, or created for everything. You can realize everything you want by a book. Book has a different type. As you may know that book is important thing to bring us around the world. Alongside that you can your reading talent was fluently. A book The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) will make you to always be smarter. You can feel much more confidence if you can know about almost everything. But some of you think that will open or reading the book make you bored. It's not make you fun. Why they may be thought like that? Have you trying to find best book or appropriate book with you?

Richard Dunn:

Spent a free time and energy to be fun activity to perform! A lot of people spent their leisure time with their family, or their particular friends. Usually they carrying out activity like watching television, likely to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) can be fine book to read. May be it could be best activity to you.

Margaretta Lee:

Precisely why? Because this The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will distress you with the secret it inside. Reading this book alongside it was fantastic author who also write the book in such amazing way makes the content inside easier to understand, entertaining approach but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have got such as help improving your skill and your critical thinking method. So , still want to hesitate having that book? If I were being you I will go to the reserve store hurriedly.

Debbie Clark:

Your reading 6th sense will not betray you actually, why because this The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) publication written by well-known writer whose to say well how to make book that can be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and composing skill only for eliminate your personal hunger then you still question The Mathematics of the Bose Gas and its Condensation (Oberwolfach Seminars) as good book not only by the cover but also by content. This is one book that can break don't determine book by its cover, so do you still needing another sixth sense to pick that!? Oh come on your studying sixth sense already said so why you

have to listening to one more sixth sense.
