*Herb Norbom*

## **Bootloader Source Code for ATmega168 using STK500 for Debian Linux: Including Makefile and Test Program** Herb Norbom

Step by Step instructions on how to put a bootloader on to the ATmega168 using the ISP STK500 programmer. The how and why of the bootloader revealed, build your own bootloader. The complete source code is included. Using avr-gcc 'C' programming language. Detailed instructions for hooking the STK500 to your computer and breadboard. Diagrams and instructions on building your breadboard included. Book is aimed at the Debian-Linux user. This book starts with the assumption that you want to know how to write a bootloader in the 'C' programming language. That you want to learn how to use an ISP STK500 programmer. You want to understand the microchip's fuses and lock bit settings and change them as you desire. That you want to load your own bootloader on to the microchip. You will cover the 'Makefile', for compiling your program and uploading on to your microchip. Learn how to build your own library for programs and headers that you want to include in your programs. This includes a uart.c program and a uart.h file. The steps needed to accomplish the loading of your bootloader are walked through giving the reader good direction. The exhibits that are included greatly enhance the visualization of the process. The book includes the complete source code for all programs and header files. The complete Makefiles are also provided. The source code and instructions for loading a test programs are also included. Even the eeprom memory is lightly covered. While this is a technical subject the author provides a great deal of insight and documentation on the process. The book goes into good depth without getting hopelessly lost in computer science lingo.

### **From reader reviews:**

#### **Gilbert Albright:**

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each publication has different aim or goal; it means that book has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are reading whatever they have because their hobby is actually reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book whenever they found difficult problem or perhaps exercise. Well, probably you'll have this Bootloader Source Code for ATMega168 using STK500 for Debian Linux: Including Makefile and Test Program.

#### **Vincent Baker:**

Book is actually written, printed, or highlighted for everything. You can understand everything you want by a publication. Book has a different type. As it is known to us that book is important thing to bring us around the world. Beside that you can your reading proficiency was fluently. A book Bootloader Source Code for ATMega168 using STK500 for Debian Linux: Including Makefile and Test Program will make you to be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that will open or reading the book make you bored. It isn't make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

#### **Anthony Rouse:**

Information is provisions for individuals to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even an issue. What people must be consider if those information which is in the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you obtain the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Bootloader Source Code for ATMega168 using STK500 for Debian Linux: Including Makefile and Test Program as the daily resource information.

#### **Suzanne Robbins:**

You can find this Bootloader Source Code for ATMega168 using STK500 for Debian Linux: Including Makefile and Test Program by go to the bookstore or Mall. Merely viewing or reviewing it may to be your solve trouble if you get difficulties for ones knowledge. Kinds of this book are various. Not only simply by written or printed but additionally can you enjoy this book through e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose right ways for you.
