Differentiated Curriculum Kit for Grade 5 - Structures (Differentiated Curriculum Kits) Brenda McGee, Debbie Triska Keiser, Jennifer Kraemer

The Earth is a solid structure on which we live, but it is not unchanging. Forces inside Earth constantly change both the inside and outside of the planet we call home. When students consider the concept of structures, they will discover that the word has many meanings. The *Structures* Differentiated Curriculum Kit provides exciting activities to help students discover the structures that exist all around them.

The books in Prufrock's new Differentiated Curriculum Kits employ a differentiated, integrated curriculum based on broad themes. This all-in-one curriculum helps teachers save planning time, ensure compliance with national standards, and most importantly, pique their students' natural excitement and interest in discovery. By participating in the wide variety of activities in the Differentiated Curriculum Kit for Grade 5, students will discover the structures around them and gain a lifelong desire to learn.

In *Structures Book 1: Geology, Expansion, and the Arts*, students will learn that structures can be physical, natural, symbolic, and metaphoric. Students will explore natural bridges, earthquakes, erosion, Westward expansion, the Industrial Revolution, and more. In *Structures Book 2: Cultures, Geometry, and Energy*, students will explore the origins of popular nursery rhymes, racial barriers, and geometry and architecture. In *Structures Book 3: Government, Cycles, and Physics*, students will study structures in time, business, monetary value, electricity, and magnetism.

Each book contains detailed lesson plans, reproducible activity sheets, and assessment tools.
