Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) Hyung-Suk Han, Dong-Sung Kim

This book provides a comprehensive overview of magnetic levitation (Maglev) technologies, from fundamental principles through to the state-of-the-art, and describes applications both realised and under development.

It includes a history of Maglev science and technology showing the various milestones in its advancement. The core concepts, operating principles and main challenges of Maglev applications attempted across various fields are introduced and discussed. The principle difficulties encountered when applying Maglev technology to different systems, namely air gap control and stabilization, are addressed in detail. The book describes how major advancements in linear motor and magnet technologies have enabled the development of the linear-motor-powered Maglev train, which has a high speed advantage over conventional wheeled trains and has the potential to reach speed levels achieved by aircraft. However, many expect that Maglev technology to be a green technology that is applied not only in rail transportation, but also in diverse other fields; to ensure clean transfer in LCD manufacturing, in ropeless high speed elevators, small capacity rail transportation, space vehicle launchers, missile testers, energy storage, and so on. These potential applications and their unique challenges and proposed technological solutions are introduced and discussed in depth.

The book will provide readers from academia, research institutes and industry with insights on where and how to apply Maglev technology, and will serve as a guide to the realization of their Maglev applications.

From reader reviews:

Thomas Paris:

Here thing why this kind of Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) are different and dependable to be yours. First of all reading a book is good but it depends in the content of the usb ports which is the content is as delicious as food or not. Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) giving you information deeper and different ways, you can find any e-book out there but there is no reserve that similar with Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic). It gives you thrill examining journey, its open up your eyes about the thing that happened in the world which is maybe can be happened around you. You can easily bring everywhere like in playground, café, or even in your technique home by train. When you are having difficulties in bringing the published book maybe the form of Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) in e-book can be your substitute.

Pamela Prince:

Do you have something that you like such as book? The reserve lovers usually prefer to choose book like comic, brief story and the biggest some may be novel. Now, why not attempting Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) that give your pleasure preference will be satisfied through reading this book. Reading habit all over the world can be said as the way for people to know world far better then how they react towards the world. It can't be said constantly that reading addiction only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start reading through as your good habit, you could pick Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) become your starter.

Dorothy Stanek:

You can get this Magnetic Levitation: Maglev Technology and Applications (Springer Tracts on Transportation and Traffic) by check out the bookstore or Mall. Just simply viewing or reviewing it may to be your solve challenge if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by written or printed and also can you enjoy this book through e-book. In the modern era like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose correct ways for you.

Phillip Martin:

Publication is one of source of knowledge. We can add our information from it. Not only for students but native or citizen need book to know the upgrade information of year to be able to year. As we know those

guides have many advantages. Beside all of us add our knowledge, could also bring us to around the world. With the book *Magnetic Levitation: Maglev Technology and Applications* (Springer Tracts on Transportation and Traffic) we can consider more advantage. Don't you to definitely be creative people? For being creative person must like to read a book. Just choose the best book that suitable with your aim. Don't end up being doubt to change your life with this book *Magnetic Levitation: Maglev Technology and Applications* (Springer Tracts on Transportation and Traffic). You can more appealing than now.
