Model Theory and Modules (London Mathematical Society Lecture Note Series) M. Prest

In recent years the interplay between model theory and other branches of mathematics has led to many deep and intriguing results. In this, the first book on the topic, the theme is the interplay between model theory and the theory of modules. The book is intended to be a self-contained introduction to the subject and introduces the requisite model theory and module theory as it is needed. Dr Prest develops the basic ideas concerning what can be said about modules using the information which may be expressed in a first-order language. Later chapters discuss stability-theoretic aspects of modules, and structure and classification theorems over various types of rings and for certain classes of modules. Both algebraists and logicians will enjoy this account of an area in which algebra and model theory interact in a significant way. The book includes numerous examples and exercises and consequently will make an ideal introduction for graduate students coming to this subject for the first time.

From reader reviews:

James Smith:

Book is to be different per grade. Book for children right up until adult are different content. As you may know that book is very important for us. The book Model Theory and Modules (London Mathematical Society Lecture Note Series) ended up being making you to know about other expertise and of course you can take more information. It is very advantages for you. The publication Model Theory and Modules (London Mathematical Society Lecture Note Series) is not only giving you much more new information but also for being your friend when you sense bored. You can spend your spend time to read your book. Try to make relationship with all the book Model Theory and Modules (London Mathematical Society Lecture Note Series). You never truly feel lose out for everything if you read some books.

Monika Cunniff:

The reason why? Because this Model Theory and Modules (London Mathematical Society Lecture Note Series) is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will shock you with the secret it inside. Reading this book next to it was fantastic author who write the book in such amazing way makes the content inside easier to understand, entertaining technique but still convey the meaning completely. This unique book will give you a lot of positive aspects than the other book possess such as help improving your ability and your critical thinking way. So , still want to postpone having that book? If I have been you I will go to the e-book store hurriedly.

Edward Roth:

Is it a person who having spare time in that case spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This Model Theory and Modules (London Mathematical Society Lecture Note Series) can be the solution, oh how comes? A book you know. You are and so out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these books have than the others?

Ron Matthies:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose the particular book Model Theory and Modules (London Mathematical Society Lecture Note Series) to make your reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy to read it and mingle the feeling about book and looking at especially. It is to be 1st opinion for you to like to start a book and go through it. Beside that the guide Model Theory and Modules (London Mathematical Society Lecture Note Series) can to be your new friend when you're sense alone and confuse with what must you're doing of these time.
