European Monetary Integration examines the background to economic and monetary union from a historical perspective that distinguishes between national and supranational currency areas, and an optimal currency area theory. The gradualist transition process is also considered. The authors, leading academics from five European countries, consider the principal economic policies to be followed in achieving economic and monetary union. The role of the European central banks and monetary policy is examined, along with fiscal policy in monetary union and the operation and policies of the labour markets.
