*Lebbeus Woods, Architect* brings together drawings from the past 40 years by one of the most influential designers working in architecture. Beyond architects, Woods (1940–2012) has been hailed by designers, filmmakers, writers and artists as a significant voice in recent history; his works resonate across many disciplines for their conceptual depth, imaginative breadth and ethical potency. Woods worked cyclically, returning often to themes of architecture's ability to transform, resist and free the collective and the individual. As an architect whose work lies almost solely in the realm of the proposed and the unbuilt, his contributions to the field opened up new avenues for exploring and inscribing space. The publication centers on transformation as a recurring theme. The organization of the images of works is thematic rather than chronological.
