Why Einstein never received a Nobel prize for relativity? "The Nobel citation reads that Einstein is honoured for "services to theoretical physics, and especially for his discovery of the law of the photoelectric effect". At first glance, the reference to theoretical physics could have been a back door through which the committee acknowledged relativity. However, there was a caveat stating that the award was presented "without taking into account the value that will be accorded your relativity and gravitation theories after these are confirmed in the future".(Article: Why Einstein never received a Nobel prize for relativity). Louis Essen wrote in 1988: "Einstein's use of a thought experiment, together with his ignorance of experimental techniques, gave a result which fooled himself and generations of scientists." But Louis Essen doesn't explain about "ignorance of experimental techniques" until someone found evidence in 2010 from the reliable source, the book 'The Universe and Dr.Einstein', by Lincoln Barnett, London, 1949, preface by Albert Einstein himself, page 78-79' This book explains that Einstein proving method via eclipse is unscientific and deeply wrong, the result will be an error. Einstein proving method via eclipse is 100 % domain of astronomy, and it's not domain of physics. This book also proposes the new thinking about gravity.
