Transition Metal Chemistry: The Valence Shell in d-Block Chemistry

Malcolm Gerloch, Edwin C. Constable

Transition Metal Chemistry: The Valence Shell in d-Block Chemistry Malcolm Gerloch, Edwin C. Constable

This book is an eminently readable introduction to structure and bonding in transition metal chemistry. Owing to its non-mathematical and highly visual approach, it is one of the most accessible texts on the role of the valence shell in d-block chemistry.

Topics covered include * stability and reactivity of transition metal compounds in their various oxidation states * spectroscopic properties * magnetic properties

Additional details and special topics are discussed in boxed sections within the text. This book will be invaluable to students and instructors alike for its non-mathematical account of key concepts and as a source of explanations and references to sources of further information.
