Building Parallel, Embedded, and Real-Time Applications with Ada John W. McCormick, Frank Singhoff, Jérôme Hugues

The arrival and popularity of multi-core processors has sparked a renewed interest in the development of parallel programs. Similarly, the availability of low-cost microprocessors and sensors has generated a great interest in embedded real-time programs. This book provides students and programmers whose backgrounds are in traditional sequential programming with the opportunity to expand their capabilities into parallel, embedded, real-time and distributed computing. It also addresses the theoretical foundation of real-time scheduling analysis, focusing on theory that is useful for actual applications. Written by award-winning educators at a level suitable for undergraduates and beginning graduate students, this book is the first truly entry-level textbook in the subject. Complete examples allow readers to understand the context in which a new concept is used, and enable them to build and run the examples, make changes, and observe the results.

From reader reviews:

David Guyton:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each reserve has different aim or perhaps goal; it means that publication has different type. Some people feel enjoy to spend their a chance to read a book. These are reading whatever they acquire because their hobby is definitely reading a book. Why not the person who don't like studying a book? Sometime, man or woman feel need book once they found difficult problem or even exercise. Well, probably you will need this Building Parallel, Embedded, and Real-Time Applications with Ada.

Jose Rosales:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these keep up with the era which is always change and progress. Some of you maybe will certainly update themselves by looking at books. It is a good choice in your case but the problems coming to an individual is you don't know what kind you should start with. This Building Parallel, Embedded, and Real-Time Applications with Ada is our recommendation to cause you to keep up with the world. Why, because book serves what you want and wish in this era.

Jonathan Smith:

That reserve can make you to feel relax. That book Building Parallel, Embedded, and Real-Time Applications with Ada was colorful and of course has pictures on there. As we know that book Building Parallel, Embedded, and Real-Time Applications with Ada has many kinds or category. Start from kids until teens. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading which.

James Esparza:

What is your hobby? Have you heard which question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. So you know that little person including reading or as reading become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to include you knowledge, except your teacher or lecturer. You discover good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is actually Building Parallel, Embedded, and Real-Time Applications with Ada.
