Global Cooling (The Time Bubble) (Volume 2) Jason Ayres

In 2029, Earth is facing a major climate catastrophe. An asteroid strike blankets the globe in dust and ash, blocking out the sunlight. Soon temperatures begin to fall. As weather conditions worsen, the residents of a small market town in Southern England must make a decision – flee south or wait for the worst to pass. Choosing to stay, D.I. Hannah Benson soon has more to worry about than keeping law and order. With power supplies failing and food scarce, survival itself is at stake as those with darker motives seek to take advantage of the situation. At Gatwick airport, Charlie Adams and his heavily pregnant wife, Kaylee, discover that all planes are grounded. Desperate to escape to mainland Europe, they travel to the coast to find a way to cross the Channel. Meanwhile, time-travel expert Josh Gardner may have found another way out. He and his partner, Alice, head for Cornwall to investigate the possible existence of a new Time Bubble, but their travel plans are also disrupted by the deepening winter. Global Cooling is the second part of a trilogy which began with *The Time Bubble*. Set a decade after the main events of the first book, this story picks up the lives of the main characters as they reach their late twenties. The trilogy concludes with the final volume, *Man Out Of Time*. A number of spin-off novels featuring characters from the series are also available. These include *Midlife Crisis*, *Rock Bottom* and *My Tomorrow, Your Yesterday*.
