Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science) Reiner Lenz

In this volume the author gives an introduction to the theory of group representations and their applications in image science. The main feature of the presentation is a systematic treatment of the invariance principle in image processing and pattern recognition with the help of group theoretical methods. The invariance properties of a problem often largely define the solution to the problem. Invariance principles are well known in theoretical physics but their use in image processing is only a few years old. The reader will find that group theory provides a unifying framework for many problems in image science. The volume is based on graduate-level lectures given by the author, and the book is intended for students and researchers interested in theoretical aspects of computer vision.

From reader reviews:

Aaron Ryan:

Within other case, little folks like to read book Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science). You can choose the best book if you love reading a book. So long as we know about how is important any book Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science). You can add understanding and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can know everything! From your country until foreign or abroad you can be known. About simple thing until wonderful thing you are able to know that. In this era, we can open a book or even searching by internet gadget. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

Information is provisions for people to get better life, information today can get by anyone at everywhere. The information can be a information or any news even a problem. What people must be consider whenever those information which is in the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science) as the daily resource information.

Jessica Hurst:

In this period of time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science) this e-book consist a lot of the information from the condition of this world now. This particular book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. Here is why this book ideal all of you.

Jean McCallum:

Beside this kind of Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science) in your phone, it may give you a way to get nearer to the new knowledge or facts. The information and the knowledge you might got here is fresh from oven so don't possibly be worry if you feel like an old people live in narrow small town. It is good thing to have Group Theoretical Methods in Image Processing (Lecture Notes in Computer Science) because this book offers to your account readable information. Do you at times

have book but you seldom get what it's exactly about. Oh come on, that would not happen if you have this in the hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss the item? Find this book as well as read it from at this point!
