Teaches students how to” think like an APRN”

This book describes an innovative model for helping APRN students develop the clinical reasoning skills required to navigate complex patient care needs and coordination in advanced nursing practice. This model, the Outcome-Present-State-Test (OPT), encompasses a clear, step-by-step process that students can use to learn the skills of differential diagnosis and hone clinical reasoning strategies. This method facilitates understanding of the relationship among patient problems, outcomes, and interventions that focus on promoting patient safety and care coordination. It moves beyond traditional ways of problem solving by focusing on patient scenarios and stories and juxtaposing issues and outcomes that have been derived from an analysis of patient problems, evidence-based interventions, and desired outcomes.

The model offers a blueprint for using standardized health care languages and provides strategies for developing reflective and complex thinking that becomes habitual. It embodies several levels of perspective related to patient-centered care planning, team-centered negotiation, and health care system considerations. Through patient stories and case scenarios, the text highlights care coordination strategies critical in complex patient situations. It provides students with the tools to collect patient information, determine priorities for care, and test interventions to reach health care outcomes by making clinical judgments during the problem-solving process. Concept maps illustrate complex patient care issues and how they relate to each other. For faculty use, the text provides links to relevant APN competencies and provides guidelines for using the OPT when supervising students in field settings.

Key Features:

- Delivers a concrete learning model for developing creative thinking and problem solving in the clinical setting
- Offers a blueprint and structure for using standardized health care languages
- Includes patient stories and case scenarios to illustrate effective use of the OPT model
- Highlights care coordination strategies associated with complex client situations with the use of the Care Coordination Clinical Reasoning model
- Reinforces methods of reaching a diagnosis, outcomes, and interventions and how to duplicate the process

From reader reviews:

Keith Smith:

Do you one of people who can't read pleasant if the sentence chained inside the straightway, hold on guys this aren't like that. This Clinical Reasoning and Care Coordination in Advanced Practice Nursing book is readable by you who hate those perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to deliver to you. The writer connected with Clinical Reasoning and Care Coordination in Advanced Practice Nursing content conveys objective easily to understand by many people. The printed and e-book are not different in the content material but it just different by means of it. So , do you continue to thinking Clinical Reasoning and Care Coordination in Advanced Practice Nursing is not loveable to be your top list reading book?

James Shipp:

The knowledge that you get from Clinical Reasoning and Care Coordination in Advanced Practice Nursing may be the more deep you excavating the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to understand but Clinical Reasoning and Care Coordination in Advanced Practice Nursing giving you thrill feeling of reading. The author conveys their point in a number of way that can be understood by simply anyone who read that because the author of this reserve is well-known enough. That book also makes your own vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this kind of Clinical Reasoning and Care Coordination in Advanced Practice Nursing instantly.

Valeria May:

A lot of people always spent all their free time to vacation or perhaps go to the outside with them household or their friend. Do you know? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity here is look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book which you read you can spent all day long to reading a book. The book Clinical Reasoning and Care Coordination in Advanced Practice Nursing it is very good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. If you did not have enough space to bring this book you can buy the actual e-book. You can m0ore quickly to read this book through your smart phone. The price is not too costly but this book provides high quality.

Katie Mueller:

A lot of publication has printed but it differs. You can get it by internet on social media. You can choose the most effective book for you, science, amusing, novel, or whatever by searching from it. It is identified as of book Clinical Reasoning and Care Coordination in Advanced Practice Nursing. You'll be able to your

knowledge by it. Without departing the printed book, it could add your knowledge and make you actually happier to read. It is most significant that, you must aware about publication. It can bring you from one place to other place.
