Satellite Spotting and Operations Handbook: For the Beginner - b&w Peter Bassett FRAS

Dedicated website; www.satellitespotting.com 2nd Edition; This is the world's first dedicated (b&w economy version) e-book / paperback guide to recognising which satellite is which, how to observe them, make interesting observations and photograph them. Includes; how to record brightness, unusual features such as spinning satellites, spy satellites in formation, communication frequencies, how to capture the space station on video and related conspiracies. Other aspects include launch sites, satellite operations, space weather, design, current research and the potential of a war in space. This book was literally 40 years in the making. I thought it was about time to publish. This is an expanded 2nd Edition copy. Other versions / signed copies may be obtained via a dedicated website; www.satellitespotting.com that will allow you to upload your own images for future editions or the website. Regarding the kind lady who left feedback should have wrote 'I didn't know you couldn't see satellites in the earth's shadow' rather than 'stars.'
