What's with the Mutant in the Microscope? Kevin Walter Johnson, James R. White
They Say Your Uncle Was Fuzzy—Or Was He?

You've heard that the theory of evolution is a fact. The hot debates and gaping holes of Darwinian evolution rarely show up in science class. Instead you learn that along with Aunt Mabel and Cousin Verne, your family tree includes a swinging set of primates, some lunkheaded lizards, and even a singled-celled...well, cell. Talk about weird family reunions!

Most people choose biology over the Bible, science over Sunday school, goo over God. Got a good response? What's With the Mutant in the Microscope? romps through the solid scientific reasons to believe God made your world. You'll learn:

Why natural selection plus micro-mutations can't produce huge change Where science gets its "facts" Why evolution becomes a religion —and biggest of all—

How the real facts of life demonstrate intelligent design. You can't afford to ignore evolution's best arguments—or the counter-argument of God's awestraking handiwork. The award-winning team of biologist-apologist James White and bestselling youth author Kevin Johnson gives you the life-altering stuff you need to know when science says your uncle is a monkey.

Are you the product of dumb luck—Or God's Design?
